Virtual ISP

By becoming an ISP you can increase and improve your company profile, maximise loyalty and revenue from your customer base and widen your customer base to new areas. You can do all of that AND make continuous monthly revenue from users of your ISP. Everything from on-line ordering to technical support is provided for you, all you need to do is advertise.↓

[CLICK HERE FOR MORE ↓](#)

How It Works

1. Review and sign the contract with SKG. Pay the £499 setup fee.
2. Within 2 weeks your online administration system will be set-up. Use it to set your retail prices (with our help if required.).
3. Advertise the service, to your current customers or new ones, using any method you feel appropriate. If you already have web site visitors, or readers of your magazine, then this advertising cost will be very minimal to you.
4. Customers sign up using on-line interface provided by us, or by CD's which we can produce under your branding and supply to you.
5. All you need to do now is fine tune your advertising, and spend minimal time administering your ISP service through the on-line interface we provide for you

Why It Works

This is not a "get rich scheme", nor is it any sort of a "pyramid selling" scheme. This service is simply based upon one simple idea. SKG and its partners have vast resources of technology and the experience to deliver that technology as a high quality end user product. What we DON'T have is a huge customer base to deliver our products to. Your company will of spent many years and a lot of money building up a solid customer base and developing your brand. Our VISP service allows you to maximise your return from all the hard work you have already put in to your company and your brand.

We have the technology. You have the brand and the customers. We assist you in providing our technology to your customers under your brand. We all make a reasonable return from the service. All parties involved in providing this service to end users are company's, so we do all make a profit, but the Dot Com bubble has burst and gone. Our partners, us and you will all make a reasonable and continuous profit from this service.

If you need convincing we are more than happy to chat openly to you about the service, please contact us on 0870 7460 991. If the appropriate person is not available, we will take your

number and call you right back.

Packages

There are several VISIP packages available. The basic package costs £499 + VAT set-up charge. Please look at the commissions to see just what return you will get on your money. The systems and services we provide are all built and designed by us and our partners, we are fully able to customise all systems to suit your exact needs and requirements.
